

AntiSpam Filtering: Apple Mail

Step 1.

Select the "Mail" menu and choose "Preferences..."

Step 2.

Click on the Junk Mail icon and ensure that your Junk Mail settings match the picture to the left.

If you have NOT been using Mail's Junk Mail filtering, please train it for two weeks before starting this procedure. If you do not do this, you may accidentally fool mail into filing good mail as spam!

Step 3.

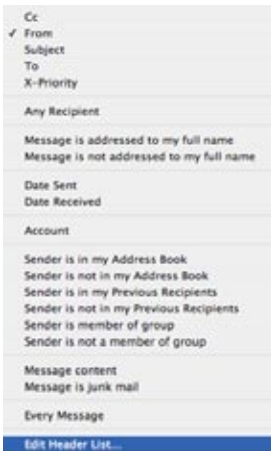

Click on the Rules icon. Now, click on the "Add Rule" button.

Step 4.

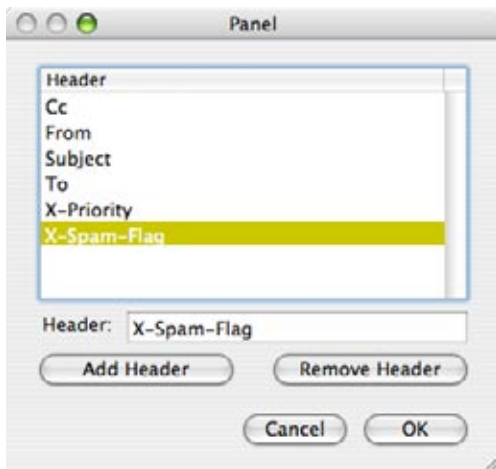

Click on the "From" pop-up menu

Step 5.

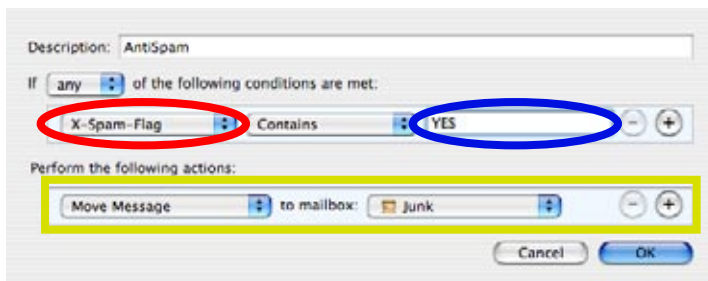

Select "Edit Header List..."

Step 6.

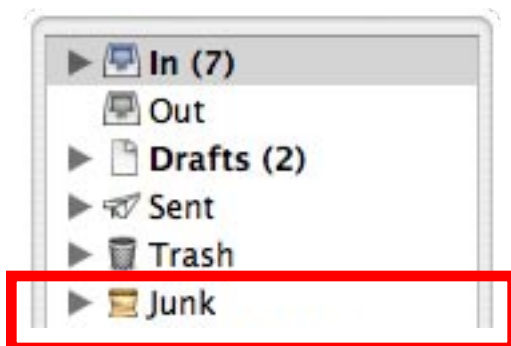

In the Header field type in "X-Spam-Flag" and click on "Add Header". Then click on "OK".

Step 7.

Type in the Description field "AntiSpam". Now, select X-Spam-Flag in the criteria field (the field circled red). In the field circled blue, type in "YES". In the area below highlighted with a yellow rectangle, select "Move Messages" and set it to the "Junk" mailbox. And finally, click "OK".

Congratulations. You have now setup Mail to automatically file mail tagged as Spam in Mail's Junk mailbox.
